

Franck Boissière, Policy Coordinator & Programme Officer, Internet of Things Unit, DG CONNECT, European Commission. Franck Boissière is in charge of IoT policy developments, with particular interest in interoperability, standardisation, cybersecurity, trust and privacy. During more than 25 years in the European Commission he has first been involved in a wide spectrum of research programmes (next generation internet, high performance computing, research infrastructures, cyber physical systems and control), and in many of the EU Digital Agenda and Digital Single Market policy such as standardisation, e-Commerce, digital payments and cybersecurity. Before joining the European Commission Franck Boissière was working research engineer at France Télécom in charge of multimedia equipment, protocols and services. He received his engineering degree from the French École Polytechnique in 1983 and specialised as telecom engineer in Telecom Paris.
