

**Jean-Paul Linnartz**

Jean-Paul Linnartz is a Research Fellow with Signify (Philips Lighting) and a part-time professor with TU Eindhoven. He and his team work on optical wireless communication systems and on personalized human centric lighting. As a Senior Director with Philips Research, Eindhoven, he headed security and connectivity and IC design research groups. His inventions led to more than 90 patents and have been a basis for successful ventures. His work has been cited over 12,000 times (GS) and he is Fellow of the IEEE for leadership in security with noisy data. During 1992-1995, he was an Assistant Professor with the University of California at Berkeley. In 1994, he was Associate Professor with TU Delft.
